

REGINE DECOSSARD

reggiedecossard@gmail.com | linkedin.com/in/regine-decossard

SUMMARY

Human-Computer Interaction (HCI) graduate student with experience spanning UX/UI design, front-end web development, and human-centered research. Led and supported projects across research (IRB, qualitative and quantitative analysis) and digital product teams. Comfortable moving from prototyping in Unity to building responsive interfaces with HTML/CSS/JavaScript and physical computing integrations, collaborating with cross-functional stakeholders.

EDUCATION

Carnegie Mellon University

Master's, Human-Computer Interaction

- ScottyLabs Designer • TartanHacks Organizer/Judge • Dean's List

Pittsburgh, PA, USA

Aug 2026

Parsons School of Design

Bachelor's; Minor: Creative Coding and Communication Design

May 2025

Bachelor's, Business Administration

May 2025

- Dean's List, 2021-2025

PROFESSIONAL EXPERIENCE

Carnegie Mellon University

Research Assistant, Game Researcher

Pittsburgh, PA, USA

Jan 2026 - Present

- Spearheading a multidisciplinary independent study evaluating transformational games aimed at helping students fail and iterate better.
- Direct the end-to-end research lifecycle, encompassing study design, Institutional Review Board (IRB) ethics approval, and data collection.
- Design research instruments and execute qualitative and quantitative analyses in partnership with production and prototyping teams.
- Facilitated workshops to discuss findings and refine product strategy, ensuring that research outcomes effectively supported game design objectives.
- Submitted research findings and game presentation to CHI and CHI PLAY to support academic dissemination and prototype refinement.

Carnegie Mellon University, Data Interaction Group (DIG)

Research Assistant, Generative AI Tools for Radiology Training

Pittsburgh, PA, USA

Dec 2025 - Present

- Contribute to the development of MedSyn, a human-centered generative AI platform for text-to-3D CT scan synthesis in clinical education.
- Engineer data mapping and preprocessing pipelines using Python to organize real radiology scans for model evaluation.
- Facilitate interface testing for an open-source GenAI radiology viewer, integrating synthetic outputs into diagnostic and educational workflows.

MBG360

Front End Development Intern

Apr 2025 - Aug 2025

- Led the end-to-end design and coding of responsive web pages using HTML, CSS, and JavaScript to improve mobile usability.
- Developed custom front-end components and personalized high-fidelity prototypes within Kajabi and Squarespace.
- Iterated on designs based on direct stakeholder feedback and collaborative input from finance and marketing teams.
- Optimized front-end performance and accessibility, resulting in improved page load times across B2B product landing pages.

New School Free Press

Web Developer

Sep 2024 - Jun 2025

- Revamped the school newspaper website's layout and functionality to enhance user experience, navigation, and accessibility.
- Coded and designed specific thematic sections for individual issues, focusing on visually striking storytelling and responsive layouts.
- Produced engaging digital graphics and promotional content for social media platforms to increase online presence.

Whitney Museum of American Art

Digital Content Intern

Sep 2024 - Dec 2024

- Produced short-form video content and digital assets for web and social media dissemination.
- Contributed to strategic planning for upcoming exhibitions and conducted archival research for documentary-style video projects.
- Supported live-streaming operations, interview transcriptions, and digital asset management.

The Metropolitan Museum of Art

Digital Intern

Sep 2023 - Dec 2023

- Spearheaded interaction design for the Jacolby Satterwhite Great Hall commission, applying human-centered principles to help museum visitors interact with the art and physical space.
- Utilized digital audio tools to edit and mix audio for broadcast and film projects, ensuring high production standards.
- Oversaw end-to-end project management of content distribution workflows on the "Perspectives" platform.

SELECTED PROJECTS

Autonomous Vision & Robotics (Vision Lab) | Carnegie Mellon University

Apr 2026

- Implemented machine learning models for lane and object detection executing on a Jetson desktop environment.
- Integrated ROS/ROS2, Arduino microcontrollers, custom PCB designs, and ultrasonic distance sensors for physical computing applications.

Interactive 3D Media & Game Development | Independent

Dec 2025 - Feb 2026

- Engineered 3D interactive experiences, including "Baby Head Space Racer" and a supermarket simulation game focused on core mechanics and casual gameplay.
- Utilized Unity, Unreal Engine, Three.js, C#, and Python, leveraging AI-assisted rapid prototyping workflows for fast, iterative experimentation.

aSa Studio Capstone Project | Carnegie Mellon University

Mar 2026 - May 2026

- Finalized a major strategic project involving comprehensive stakeholder workshops and a formal spring presentation.

SKILLS

Design & Prototyping: UI/UX Design, Interaction Design, Wireframing, Branding/Brand Strategy, Product Design, AI Tools

Front End / Web: HTML/CSS, JavaScript, Bootstrap, jQuery, React.js, Next.js, Web Development

3D, Game Dev & Hardware: Unity, Unreal Engine, Three.js, C#, ROS/ROS2, Arduino, Raspberry Pico, PCB Design, Physical Computing

Data / AI / Analysis: Python, R, BigQuery, Jupyter, Data Analysis, Generative AI, Claude, Business Analytics, Financial Analysis

Tools: Adobe Creative Suite, Firebase, Heroku

Programming (additional): Java, C/C++, iOS/Swift

Product & Research: Product Management, Market Research, Communications, Business Strategy
